

Students:

1. Click on the Forces in Earth's Crust slideshow. Follow the directions in the slideshow and know that your next assignment will be based on learning and remembering what is taught. You may want to jot down some notes.
2. When you know your stuff, click on the Forces Graphic Organizer. There are three separate activities (5 pages) to complete before you submit the lesson for this week. Make sure you read the directions carefully. This assignment is worth 14 points.
